

ABSORBING SHEET - COMAB

Features

- This resin sheets from 0.4 to 4.0 mm thickness exhibit high flexibility in shape and can be cut or bent to conform with the objectives.
- By applying this sheet to the gap between P.C. boards and the enclosure, noise generated from the boards can be absorbed.
- Provision of the sheet in specific shapes or with adhesive tapes are possible if requested.

Specifications

Characteristics	COMAB-03
Initial Permeability	7 μ iac (10 MHz)
Density	3.7g/cm ³
Volume resistivity	10 ¹² Ω •cm
Dielectric breakdown voltage	9kV (t=1mm)
Flamme retardant	UL94V-o

4 types of thickness are available
DIN A4 (210mm \square 297mm) size is standard

FMAB00.40210NA0297	0.4mm thickness
FMAB00010210NA0297	1.0mm thickness
FMAB00020210NA0297	2.0mm thickness
FMAB00040210NA0297	4.0mm thickness
